Dobson Award for Young Scientists

Subject: "Dobson Award for young scientists"
Action: Nominations should be received before December 31, 2003

The "Dobson Award for Young Scientists" is granted for one or more outstanding research paper(s) in atmospheric sciences published or accepted in a refereed journal since the last Quadrennial Ozone Symposium (July 2002) by a young scientist (within 10 years of Ph.D). The person nominated for the Award should be the first author of the cited paper. Complete nomination packages (an electronic copy of the paper in pdf format, a brief curriculum vitae of the candidate, and two endorsement letters describing the impact and innovation of the paper) should be e-mailed to: zerefos@geol.uoa.gr. Incomplete or unreadable electronic files cannot be considered, although we will make every effort to e-mail the nominator to obtain a legible nomination package.

Self nominations will not be considered. Papers that have previously won the Dobson Award for Young Scientists are not eligible. The Award Committee may decide not to give the Award, if none of the papers submitted is of a sufficient high scientific standard. The Award consists of a certificate accompanied by a prize defined by the Local Organizing Committee at the beginning of each Quadrennial Ozone Symposium.

The deadline for submission of proposed papers accompanied with their endorsement letters is the 31/12/2003. The Awards will be presented at the next Quadrennial Ozone Symposium (QOS) in June 2004. Selection of successful papers will be made by the Award Committee which consists of seven IOC members. The assessors will judge and rank the papers submitted for the Award, according to the following criteria:

- ❖ Innovation
- ❖ Impact
